VITAL STATISTICS

Live Births:—

Legitimate	4,357
Illegitimate	333
Total	4,690

Birth Rate per 1,000 population 17.26

Still Births:—

Legitimate	171
Illegitimate	17
Total	188

Rate of still births per 1,000 total births 40.08

Deaths:— Total 3,316

Crude death rate per 1,000 population 12.21

Deaths from Diseases and accidents, of Pregnancy and Childbirth:—

From Sepsis	2
Other causes	9

Maternal Death Rate per 1,000 total births 1.8

Deaths of Infants under 1 year of age 221

Death Rate:—

All Infants per 1,000 live births	47
Legitimate Infants per 1,000 legitimate live births	46
Illegitimate infants per 1,000 illegitimate live births	60
Deaths from Heart Disease	788
Deaths from Cancer	465
Deaths from Tuberculosis:—	
(a) Pulmonary	119
(b) Other forms	37

Sanitary Inspection

The increasing demand of Civil Defence duties on the time of Inspectors is still curtailing systematic inspection of districts, and as a rule only urgent matters are being dealt with, but it appears that all complaints are promptly investigated and remedied as quickly as possible. The supply of materials for repair work has slightly improved but still affords at times a good excuse for not carrying out necessary works.

Housing

Progress in this respect has ceased, judged from a pre-war standard, but the slight increase in overcrowding and general maintenance of reasonable conditions reflects credit on Local Authorities. Although restricted, improvements under the Housing (Rural Workers) Act, are still carried out if recommended by the War Agricultural Committee as necessary.

Rural Water Supplies

For military purposes, extension of water mains has increased and in some cases is taxing the pumping plants, but a good supply is maintained. A satisfactory feature is the control of quality by regular sampling for chemical and bacteriological examination, a most important precaution.

For fire fighting and emergency purposes it is most important that unused wells and pumps be kept in good condition.

Scavenging

Owing to labour difficulties, many rural Authorities have been forced to reduce the frequency of collection, and the public will have to make greater efforts on their own behalf.

Sewerage and Sewage Disposal

No major additions have been made to schemes of Local Authorities, but increased service installations have caused some difficulties owing to poor siting and inexperienced operation; closer liason in this matter between the service departments and Local Authorities would have minimised these troubles.

Milk (Special Designations) Order, 1936

The general standard of production remains satisfactory, the number of licences issued being 10 T.T. and 181 Accredited. Of 367 samples from licensed producers, 86 or 23% were unsatisfactory.

INFECTIOUS DISEASES

There was no major epidemic of any of the infectious diseases in 1941.

Particulars of the cases notified are given in the table which follows:—

Notified Cases of Infectious Diseases in Urban and Rural Districts—1941

SANITARY DISTRICTS	Total number notified	Diphtheria and Membranous Croup	Erysipelas	Scarlet Fever	Typhoid Fever & Paratyphoid	Puerperal Pyrexia	Respiratory Tuberculosis	Other Tuberculous Diseases	Small-pox	Cerebro-spinal Meningitis	Ophthalmia Neonatorum	Pneumonia	Encephalitis Lethargica	Poliomyelitis	Dysentery	Polio-encephalitis	Measles	Whooping Cough

Diphtheria

Compared with the previous year there were 102 fewer cases of Diphtheria reported. There were 6 deaths as against 10 in 1940.

Typhoid and Paratyphoid Fever

Nine cases of these diseases were notified in 1941 as compared with 4 in 1940. There were no deaths.

Cerebro Spinal Meningitis

The increased prevalence of this disease reported last year is again evident. The average number of cases notified for the five year period ended 1939 was 3 and the average number of deaths for the same period 1. In 1940, 90 cases were notified and there were 23 deaths. In 1941, there were again 90 cases notified with 15 deaths.

Isolation Hospital Accommodation

Treatment in Isolation Hospitals was provided by the County Council for 351 infectious cases during the year. 145 of these were treated at the Council's own hospital at Brumby. The remainder were, by arrangement, dealt with at hospitals belonging to other authorities. Particulars of the cases admitted are as follows:—

Number of Admissions

Isolation Hospital	Scarlet Fever	Diphtheria	Cerebro Spinal Fever	Typhoid and Paratyphoid	Erysipelas	Mumps	Measles	Other Diseases
Brumby	40	73	6	2	—	9	—	15
Doncaster	15	2	—	—	—	—	—	4
Osgodby	67	14	—	—	1	2	3	—
Scartho	42	15	19	4	—	3	2	19
	—	—	—	—	—	—	—	—
	164	104	25	6	1	14	5	38

The additional 18 beds being provided at the Brumby Hospital should reduce considerably the number of cases at present being sent to hospitals belonging to other authorities.

Tuberculosis

Notifications

New cases of Pulmonary Tuberculosis notified during the year numbered 146. 98 cases of other forms of the disease were also reported. The figure for Pulmonary Tuberculosis is the lowest recorded for the County since the disease became notifiable. The highest number of new cases was notified in 1916 when the figure was 554.

It is interesting to compare the notification figures for the War period 1938—41 with that for 1913—16.

Notifications 1938—41			Notifications 1913—16		
	Pulmonary	Other forms		Pulmonary	Other forms
1938	221	99	1913	227	92
1939	191	90	1914	277	74
1940	181	89	1915	270	71
1941	146	98	1916	554	76

Death Rates

There were, as already stated, 119 deaths recorded as due to Pulmonary Tuberculosis and 37 as due to other forms of the disease. The death rate per 1,000 of the population for Pulmonary Tuberculosis was, therefore 0.45 and that for other forms of the disease 0.12.

Public Health (Tuberculosis) Regulations, 1930

Summary of Notifications during the period from the 1st January, 1940, to the 31st December, 1941

Age Periods	Formal Notifications												Total Notifi- cations

Institutional Treatment

Patients receiving institutional treatment during the year, numbered 343 of which 248 were pulmonary and 95 were non-pulmonary cases.

The County Sanatorium at Branston provides 68 beds for women and children. Adult male patients requiring sanatorium treatment are sent to institutions belonging to other authorities.

The Medical Superintendent provided the following summary of the work done in connection with the Branston Sanatorium during the year.

Work done at the Sanatorium during 1941

1. Adults

Admissions	72		
Discharges	77	As quiescent 28
		As non-quiescent 23
		Died 15
		As non-tuberculous 11

2. Children

	Boys	Girls	Total
Admissions 11	17	28
Discharges 11	11	22
Quiescent 7	5	12
Non-pulmonary	1	1	2
Non-tuberculous	2	5	7
No diagnosis made	1	—	1

3. X-ray work

Total number taken	580
In-patients	478
Out-patients	102
Bronchograms	6
Adults	2
Children	3
Out-patients	1

4. Artificial Pneumothorax work

In-patients.	No. of Artificial Pneumothoraces induced	31
	Total No. of Refills given	637
	No. of patients receiving treatment	36
	No. of patients with Bilateral A.P.	6
	Pleural Washouts given	1
	Gas-replacements	1
Out-patients.	Total No. of Refills given	114
	Total No. of patients attended	12
	Gas-replacements	1
	Removal of fluid from chest	1

5. Other work

Transferred to Scartho Sanatorium for Thoracoscopy	8
Transferred to Brompton Hospital for Thoracoplasty	1
Temporary Phrenic Crush	1
Sanocrysin treatment	2

Venereal Diseases

New cases attending the treatment centres during the year, numbered 157, syphilis 52 and gonorrhoea 105. The number of new cases reported last year was syphilis 51 and gonorrhoea 94.

The foregoing figures include Lindsey patients who attended Clinics outside the administrative County.

The number of patients remaining under treatment at County Clinics at the end of the year was 109. Pathological work in connection with the V.D. Centres continues to be carried out by the Consultant Venereal Diseases Officers at the Grimsby Corporation Laboratory when 3,005 specimens were examined in 1941. The majority of these, viz. 2,163, were from the treatment centres. Hospitals submitted 644 and private practitioners 198.

CANCER

There were 465 Cancer deaths registered in 1941. This is the highest number hitherto recorded for the County. The age and sex distribution of cancer deaths will be found in the mortality tables given, at the beginning of the report. It will also be noted that cancer as a cause of death is second only to heart disease, and was responsible for nearly one seventh of all deaths in the County during the year.

A joint scheme to serve the geographical County of Lincolnshire, prepared under the Cancer Act 1936 has been approved by the Minister of Health. It will not be possible to put the full scheme into operation during the war but arrangements to open one treatment centre at Scunthorpe are proceeding, and will be completed shortly.

This centre will service the whole of the geographical County until it is possible to bring the full scheme into being.

General Hospitals

The year under review has been one of increased activity for the Council's General Hospitals at Brigg and Louth. Mr. N. J. Nicholson, F.R.C.S., who is the Superintendent and Surgeon at the County Infirmary, Louth, has also undertaken to act in a similar capacity at the County Infirmary, Brigg. This will further the co-ordination of the work of both Hospitals. Mr. Bailey, F.R.C.S., of Scunthorpe, has also been appointed as Surgeon at the Brigg Infirmary. The following is a summary of the admissions and discharges for 1941.

	Admissions.	Births.	Discharges.	Deaths.
County Infirmary, Brigg	606	62	566	58
County Infirmary, Louth	1633	168	1683	159

Blind Persons, Act, 1920

The number of registered Blind persons in the County is now 439 of which 223 are males and 216 females. The age groups of those registered are as follows:

5 yrs.	5-16	16-21	21-50	50-70	70 and over
1	11	9	89	134	195

Mental Deficiency

The following is a summary of the mental defectives on the County Register at the end of 1941.

(A) Number of Cases "Subject to be dealt with"		Males	Females	Total
1.	Under 'Order':—			
(a)	(1) In Institutions, (excl. cases on Licence) Aged 16 years and over	21 126	13 141	34 267

3.	In Institutions but not under the Mental Deficiency Act	72	41	113
TOTAL		595	499	1094

*Includes 14 cases awaiting classification.

Maternity and Child Welfare

Midwifery

There were 184 midwives in practice in the administrative County at the end of the year, 125 as district midwives and 59 in institutions. They attended either as Midwives or Maternity Nurses 2,877 cases in the patients' homes and 1,983 in institutions. Medical aid was summoned by Midwives in 1,306 cases.

Notifications as required by the rules of the Central Midwives Board, were received in respect of the following:—

Still births	45
Liability to be a source of infection				55
Artificial feeding	51
Laying out the dead		17
Death of Mother and Child			23

Ante-Natal Care

The number of expectant mothers attending the Ante-natal Clinics during the year was 2,628. In addition, 65 were ante-natally examined in their own homes by medical practitioners on behalf of the Authority. Home visits to expectant mothers by Health Visitors numbered 1,827.

There were 118 patients admitted to institutions for ante-natal treatment.

Maternity Homes

Particulars of maternity cases admitted to Maternity Homes administered by the County Council, and also to other of the Council's institutions, provided with Maternity Wards, are given in the table which follows.

Institution	No. of admissions	Average Stay in days	Cases Delivered		Infant Deaths		Maternal Deaths
			By Doctors	By Mid-wives	Still Born	Died within 10 days of birth	
Cleethorpes Maternity Home	364	14	86	254	13	3	—
Gainsborough Maternity Home	223	13.5	103	102	12	2	1
Gate Burton Emergency Maternity Home	506	14	24	443	7	4	—
Scunthorpe Maternity Home	604	12.4	188	349	33	10	1
County Infirmary, Brigg	63	14	8	55	1	1	—
County Infirmary, Louth	241	20	47	135	14	1	1
Spilsby Public Assistance Institution	1	23	—	1	—	—	—

In addition to the patients referred to in the above table 112 cases chiefly of abortion or miscarriage were admitted through arrangements made by the County Council to voluntary Hospitals or to Institutions belonging to other authorities.

Of the patients admitted to institutions controlled by the County Council, 430 were suffering from some abnormality in connection with the pregnancy or confinement.

Infant Welfare

During the year, the total number of attendances of children under 5 years of age, at the Welfare Centres was 50,693; of these 32,337 were made by infants under the age of one year. The number of children who attended for the first time in 1941, was 3,007 and the number included 2,389 infants under the age of one year.

Visits to the homes of children under 5 years of age made by the Health Visitors amounted to 62,664. This figure included 34,334 visits to infants under one year of age.

The Health Visitors have continued to act as child life protection visitors, and have visited regularly all children registered under Sec. 206 of the Public Health Act, 1936. 549 visits in respect of 65 children were made during the year.
